

Our last newsletter was in March. We have been too busy to write another newsletter until now. In this August issue we have some fantastic research results with our new Magno Pulse 2. We have also developed two new Colloidal Silver Products.

NEW MAGNETIC PULSAR

(called the Magno Pulse 2)

For many years now we have been importing the Magnetic Pulsar from SOTA in Canada. It is a very good product. However, many people have found it too expensive (£187 plus shipping).

We know, from many years of clinical experience with numerous Patients, that the magnetic pulsar has produced amazing results. In Commercial Science it is our strongly held belief that beneficial scientific ideas should be made available to the public whenever possible. To that end we have spent the last year developing our own even **more powerful** Pulsed Magnetic Field at significantly **less cost**; so more people will be able to afford to benefit from this technology.

Our Magnetic Pulsar has been made cheaper by using our higher voltage mains electricity. (Canada only use 110v we use 240v) We have also put two disposable components in the device which will last the typical user many years and will cost a small amount to replace. (The SOTA device has a large capacitor which needs replacing at considerable cost).

Any health condition that requires an increase in the rate of healing will benefit from the use of the Magno Pulse 2. The applications are endless.

It will be particularly beneficial to the elderly or to any one whose healing is compromised. It is very safe and can be used any where on the body; even on babies!

This is how one of our patients used the Pulsar:

Mrs L. Broken arm failed to heal after one year and number therapies and treatments. She used the Magnetic Pulsar - Two Pulses per hour for 4 weeks; Bone demonstrated by X-ray to have healed (all treatment during the previous year had failed to help).

Mr B. Tooth Abscess. Five pulses every hour for 3 days. Abscess pain diminished and cleared up.

Call 01293 446244 if you would like more information on the Magno Pulse 2, Cost £125 a **saving of £53** over the SOTA device.

NEW COLLOIDAL SILVER PRODUCTS:-

Roll on deodorant.

This new product contains nothing but Colloidal Silver and a plant based gelling agent. There are no preservatives, it is free from alcohol, free from pore-clogging aluminium, parabens and other nasties.

Several studies in the last few years, including a recent study by the University of Reading in the Journal of Applied Toxicology, have discovered the synthetic chemical parabens (a preservative) in tissue taken from women with breast cancer. Parabens mimic the female hormone oestrogen, abnormal levels of which are linked to the growth of cancer.

It will not prevent the essential process of perspiration, which will occur somewhere else on the body if you do stop it.

Suitable for people who may be prone to eczema and psoriasis

Suitable for vegans and vegetarians. Code 5145 £5.90

Colloidal Silver Spray

This contains high grade yellow Colloidal Silver and nothing else. There are no preservatives or proteins, just Silver and pure water. The spray can be used anywhere, for example from sore throats to nappy rash. It is safe for babies.

Suitable for people who may be prone to eczema and psoriasis

Suitable for vegans and vegetarians. Code 5127 £10.50

DID YOU KNOW:-

- ✓ We are not yet registered for VAT yet - but it is likely to happen soon so prices will increase accordingly.
- ✓ All staff manning the phones are volunteers - so treat them nicely.
- ✓ Staff do not receive salaries.
- ✓ No one gets profits
- ✓ All spare money generated goes back in to research.
- ✓ Most of our researchers donate their time freely.
- ✓ The name Goodvitality was created because most people using natural therapies see the word Science and become fearful and distrustful, although Commercial Science is only interested in exploiting the beneficial scientific ideas that would not make profits and cause no harm.
- ✓ We like to test and demonstrate to ourselves the benefits of a health product before we supply it. For example we could make a Rife machine, but over the last 10 years we have never been able to reproduce Rife's effect on micro-organisms. So we will not supply it!

We hope this gives you some idea of how we feel about health and ethics!

Ulcers and Ozone

In the past we have told you how effective and easy it is to treat leg ulcers with ozone gas. The pictures here illustrate the improvement gained in just 12 days of treatment. Notice, in the left hand picture, the ulcer is full of infected material and the inflammation is spreading outward as the

ulcer is growing. In the right hand picture the inflammation around the ulcer is dramatically improved and a healthy scab has formed on the ulcer. The Ozone treatment is very simple and because the ulcer and its surrounding tissues are not touched, it does not hurt the patient. All that is required is a simple polybag made in to a little "tent" with aid of some micropore tape (in this case the bag was a simple sandwich bag). The Ozone tube is then put in to the "tent" and Ozone gas from the Ozonator (code 5030) is pumped in. See picture on left hand side. Patients report that the ulcer tingles with the gas and then puckers up after treatment. Also, unlike a lot of treatments, very little pain is felt by the patient, something that can not be said for most other treatments.

When purchasing an Ozonator from us, a copy of the treatment programme used by this patient will be included.

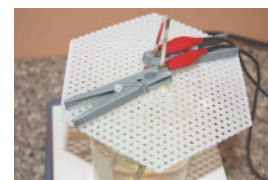

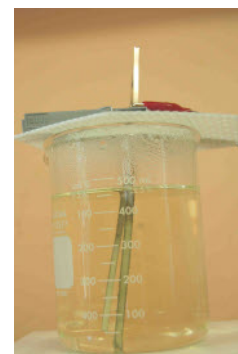

Code 5030 £110 (at time of going to press)

NEW SIZE SILVER ELECTRODES.

Many people have been asking for longer electrodes especially for use with the beaker and gauze that we supply. The larger the area of silver you have in your water the faster you will produce your Colloidal Silver. So if you double the area of silver you have in solution, it takes half the time to produce your Colloidal Silver. Suitable for both Becks Silver/Zapper and all our Colloidal Silver makers.

So we are now supplying 160mm long Pure silver electrodes,
product code 5121 £20.00

LEE CROCK NEWS

times changed to 3mins.

Lee Crock is now using 3 minutes in his Aura Cleanser (it does not come with an on/off switch). So after many requests, we have produced a new 3 minute chip which you can fit to your **Aura B**. The chip is very easy to fit and full instructions are included. The chip only costs £12 plus P&P. Product code 5305.

NEXT BECKS TRAINING DAY BOOK NOW

The Becks Training Day will be held on 8th Nov 2008. The last training day was a huge success with people from all backgrounds coming along to find out more about the most effective ways to use the Becks Protocol. You can also earn money as a Becks therapist. There are very few of us. For information on how I work as a Becks therapist check out my web site : www.chris-hyslop.com

Apricot Kernels really do shrink tumours.

Code 7004

For nearly 20 years I have treated cancer patients using all sorts of treatments. The common thing about most cancer patients is that they are often using a whole raft of treatments and therapies at the same time, so it becomes very difficult to see what is really helping. Recently though 2 of my patients have seen dramatic improvements when just using Apricot Kernels.

Patient 1. Female in her 50's had cancer of the Gluteus maximus (buttock muscle). She had a mass the size of a grapefruit, removed and had radiotherapy followed by an MRI and Xray to assess the situation. At that point the Doctors said there was nothing more to be done and to come back in 4 months to see how much it had grown back and what to do next. At this point the patient went on to Apricot Kernels and vitamin C, as the protocol recommends and nothing else. Dutifully she went back to her Doctor had an Xray and reported to his office (private health care). The Doctor had already filled in the form for the next course of Radiotherapy. However when he looked at the patient's Xrays, he was staggered and said "I am shocked your tumour has shrunk - I don't understand it" and threw his forms in the bin.

For me this is a very convincing story because we had a calibration Xray at the beginning and end of this period on just Apricot Kernels demonstrating a clear tumour shrinking effect.

Patient 2. "You very kindly gave me some information and help recently, my partner Andy had bowel cancer with secondary liver cancer. We received the Apricot Kernels and the Ester C that you sent on the Saturday and by the Wednesday Andy was taking 50 kernels a day. No nausea at all.

Andy's previous chemo regime was not working and his CEA levels had continued to rise from 3.1 post op to 51 as reported by his oncologist on the 24 June. We have completely changed our diet following that appointment and my discussion with yourself. Prior to Andy starting his new chemo regime yesterday his bloods were tested - the CEA levels had dropped to 28, this can't be attributed to the original chemo as his levels were rising and he hadn't yet started his new treatment. I am 100% confident that this has been attributed to the changes we have made, the Kernels and the supplements. We have always tried to be positive that he would beat this - now even more so.

So I wanted to say thank you for all your help and support, it has made a huge difference. Its such a tragedy that so many people will never know or benefit from the vast range of complementary medicines and therapies because conventional medicine is unable/unwilling to acknowledge it".

Here again we have another demonstration of the Apricot Kernels having a clear effect on the levels of cancer markers - a fantastic result. So for 900g of Kernels which lasts many months costing just £32.45, you can reduce the size of a tumour or perhaps any type of cancer.
