

February 2009

11 Hylands Close  
Crawley  
West Sussex RH10 6RX

Happy New Year. You have probably been busy detoxifying and getting fit for the New Year and if you are like me have broken most of your New Year resolutions. Hopefully this newsletter will give you some extra ideas to improve your level of health.

**HEALTH TIPS.** Keep an eye on our web site [www.comsci.org.uk](http://www.comsci.org.uk) the Health Tips button can be found at the bottom on the left hand side. When you select this you will get a whole list of health problems and solutions. It really is a great resource. If you do not have a computer, your local library has and the Librarians will show you what to do.

## **NEW AURA CLEANSER. (Aura B Mark III). Gives nearly twice the battery life!!**

This new Aura B has been developed to use 40% less power. It still has exactly the same output specifications but you can expect it's battery life to almost double. We estimate that it will run continuously for 3.42 years (obviously a bit difficult to test).

It has a new bigger case with 25% increase in storage capacity so you can store a screen in it too.

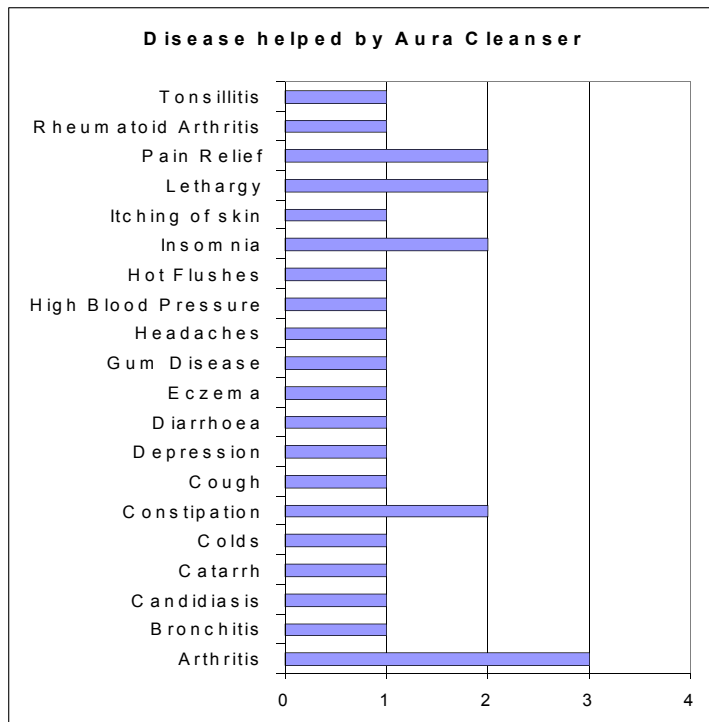

We have managed to do all this without increasing the price.

For those of you that do not know what the Aura Cleanser is we have a copy of the Original Article that was printed in the Nexus magazine (Aug/Sep 2003) it can be downloaded from [www.comsci.org.uk](http://www.comsci.org.uk) see the Aura Cleanser section.

The Aura Cleanser is a bit of a misleading name, simply put it is a really good intra cellular detoxifier. It uses a very low powered EMF (4.5v) field which alternates its polarity to push and pull toxins out of your cells, rather like the tide on a beach. Naturally this happens to us twice a day with each turn of our planet and the gravitational effect of the moon. The Aura B can mimic this effect every minute (depending on the timing chip) so it dramatically speeds up this cleansing effect. Here in the clinic we have had many patients recover from all sorts of complaints from arthritis to even heart problems using just the Aura B. To get the very best detoxifying effect you can use the Aura B with Ozonated water (3 glasses per day). So the Aura Cleanser liberates toxins and free radicals from your cells and the Ozonated water mops them up for you; it is one of the best method of de-toxing we know of. For more information you can the "Health Tips" on the

[www.comsci.org.uk](http://www.comsci.org.uk) and don't forget to look at all the Newsletters too (Nov 2003, Apr 2004, Oct 2004, Jan 2005, Dec 2005 Feb 2007, June 2007, Sep 2007) There is lots of information there. On the next page you can see the results of the Aura Cleanser survey we carried out; it shows a whole range of benefits.

### Some words from our Customers about the Aura Cleaner

Mr A. "My Frozen shoulder was 80% better after just one night of treatment I am amazed".

Mr I. "This machine is fantastic, this is as good as a 28 day water fast detoxification"

Mrs T " I am sleeping like a baby again, after years of insomnia".

Mr A "My Arthritis gets better every day".

Mrs E "Now I am sleeping so well and have so much energy".

Ms D "My Eczema has got so much better, nothing else worked, I am so pleased".

## Colloidal Silver Gel heals a horse

### Proud Flesh.

For those of you that have never heard of proud flesh it is summarised as follows:-

Nature wants to heal wounds, but horses have a particular problem with wound healing, particularly on the lower parts of the limbs, which results in the development of large fleshy outgrowths, known as "proud flesh" or granulation tissue.

Granulation tissue is a normal component of naturally healing wounds. Normal granulation tissue looks red-pink in colour and has a flat surface without obvious clefts or changes in colour. It is the base upon which the new skin surface cells are supported while they migrate across the wound to provide a healed surface. In horses this can be slow and results in proud flesh.

This Customer's horse had been suffering for about a year before she came across Colloidal Silver Gel and gave it a try. She and her vet were amazed about the result which can be seen in these photographs. These pictures were taken over approximately 2 weeks.

This is a very interesting illustration of Colloidal Silver actually promotes healing; we think of Colloidal Silver mostly as an anti-microbial agent. So if you have any wound that is failing to heal Colloidal Silver Gel, could be worth a try; after all a small jar of Colloidal Silver Gel is only £7.00  
Code 5130

# NEW MAGNETIC PULSAR

(called the Magno Pulse 2)

The New MPO2 has gone down a storm, we could not keep up with demand. Lots of you are very pleased with it and have obtained great results.

The main questions we get from people are what can it do how do you use it?

Put very simply, in our tests we have found that the MPO2 speeds up cell division and so can help with the healing process anywhere in the body.

If you would like a free copy of the instructions for the MPO2 which comes with lots of reports from patients and how they used the MPO2 to treat all sorts of problems please give us a call on 01293 446244 or download it from [www.comsci.org.uk](http://www.comsci.org.uk)

## Tennis Elbow

One customer has just reported to us that he found it very useful in treating his tennis elbow: he gave the area three pulses once per hour. Perhaps someone could try it out on a frozen shoulder!! It could prove really helpful - let us know.

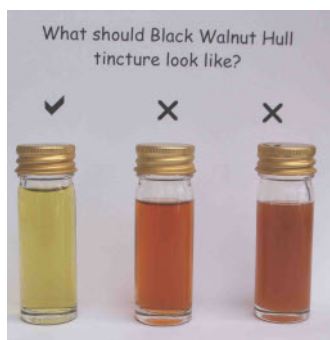

## NEXT BECKS TRAINING DAY BOOK NOW 16th May 2009

The Becks Training Day will be held on 16th May. The last training day was a huge success with people from all backgrounds coming along to find out more about the most effective ways to use the Becks Protocol. You can also earn money as a Becks therapist. There are very few of us. For information on how I work as a Becks therapist check out my web site [www.chris-hyslop.com](http://www.chris-hyslop.com)

## Hints and tips.

### Black Walnut Hull Tincture.

Our tincture is made exactly as Hulda Clark does it, it even contains Vitamin C. So it is really green not a brown muddy colour

where most of the active components have been oxidised. To keep it really fresh keep it in the fridge especially once you have opened it!

### Apricot Kernels

Following the last newsletter, the article about the success of treating cancer using apricot kernels alone, meant we rapidly ran out of stock. We have now them back in stock and will hopefully not allow them to run out again, (the cosmetics industry bought them too - we wonder why - anti aging perhaps!)

### Cancer Prevention.

Did you know that taking apricot kernels may help to protect you from developing cancer. (an ounce of prevention is worth a pound of cure). Chris Hyslop take 10 kernels per day 5 with breakfast and 5 with an evening meal.

## Making Yellow Colloidal silver!

We are still getting lots of calls about making yellow colloidal silver especially since Chris' utube videos on the subject has now had more than 20,000 hits!!

The full lecture is available on DVD for only £11 code 5170, over 90% of this goes to Mark Bennett who kindly volunteered his time to record the lecture.

## Our Sweeping frequency 14v Clarks Zapper

### Did you know:-

1. Two people can zap at the same time. You just need an extra set of crocodile clip extension leads.
2. The Sweeping Frequency Zapper goes to a lower frequency (10kHz) than the original Zapper (32kHz) and therefore is targeting organisms that the original one doesn't reach.
4. It does not put out one broad band of frequencies with all the notes mixed up in it, this unit hits each note separately and works in a sweeping pattern. i.e. Da Daa Daaa Daaaa Daaaaa. This is more effective.
5. Unlike the Becks Zapper you can Zap specific parts of the body, like a Knee joint or your liver. So you can target a specific part of the body.
6. Also as far as we know it has the highest voltage of all the Clark Zapper on the Market at 14volts; so it will get maximum tissue penetration.
7. Scientific research has demonstrated that the Clarks Zapper makes white blood cells more aggressive. This unit is our most popular model. Code 5206

## Parasites

### Many of us have parasites and don't even know it!

In fact if you eat a healthy diet with lots of raw fruit and vegetables you are at a high risk of being infected with parasites. Cooking will kill most parasites however cooking kills most of the active nutrients in food so it's a bit of a catch 22.

### Signs and symptoms.

There are many problems caused by parasites but one of the first clues to having them is malaise or tiredness. You may suffer gastric symptoms (IBS, bloating, constipation, diarrhoea etc..) yet never see anything wrong in your stools.

This picture shows an egg capsule of *Toxocara canis*. The ovoid, pitted capsule wall is typical of this species. It infects canines and poses a considerable risk when the egg capsule is ingested by humans. The migrating larvae often lodge in vital organs such as the brain, spinal cord, and eyes causing a condition known as visceral larva migrans. This is the worm you may have seen your dog "cough up" or pass in its stool. Children should be forewarned not to kiss dogs or let them lick their faces. The picture below shows the adults.

### So what do you do?

Hulda Clark believes parasites are responsible for all sorts of problems; she says she even finds a parasite at the centre of cancers. Hence she developed her Zapper to deal with parasites in tissues. (the most popular Zapper we sell is the 14volt sweeping frequency Zapper code 5206). However parasites in the guts are not affected by the Zapper hence the need for the herbal program for killing of your gut parasites. (if you buy all three herbs in the program you SAVE 10% product code 7007).

### How do you prevent getting them?

Fresh food is best treated by putting them in water that has been ozonated. It is very simple to do and may even help preserve some of the anti-oxidants in the food. Here are some tomatoes being ozonated it could not be easier. All cold foods should be Ozonated. Meat and fish should be thoroughly cooked and think that if the meat is still raw in the middle parasite may survive!
