

Aura Cleanser B (Battery Powered).

This aura cleanser works in exactly the same way as the one featured in
September 2003 Vol 10 No.5.

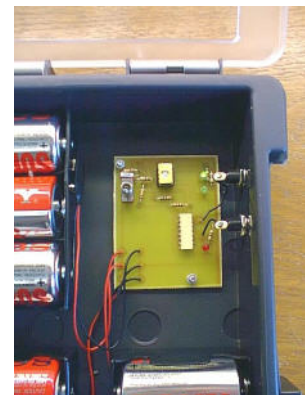

It can be used as a Mexistim where only one output is used and connected to a wire mesh which the patient lies on. It can also be used as a Lee Crock's early device where there are two meshes used one above and one below the patient, (both outputs are used one for each plate).

The Circuit board inside the battery compartment has a switch to turn the Aura Cleanser B on and off and 3 lamps to indicate the following.

The two green lamps show that which of the two outputs is connected to the positive end of the battery. This should swap every 15 mins (unless a special alternate time chip is fitted).

The red lamp indicates that the batteries need to be replaced. The Aura cleanser is no longer swapping polarities.

The battery compartment, contains 3 sets of battery holders for 3 groups of 3 10 D cells.

Simple Instructions.

1. Put the D cells in to the battery compartment as shown above, make sure they are put in the correct way, follow the symbols on the battery holders carefully (the batteries should be replaced when the red lamp comes on).
2. Plug the lead in to either output socket (it does not matter which one as they are swapped round every 15 mins), and connect it to your mesh screen.
3. Switch on the silver switch, a green lamp will come on to show the system is working. Every 15 minutes you will see the green lamps swap position, showing that the polarity of the polarity of the batteries has been swapped.

If you wish to use your Aura Cleanser with two mesh screens, you will need to buy a second output lead (code 5350) plug the second lead in to the other output and attach that to your second screen. How you use the Aura Cleanser is entirely up to you; the article in Nexus gives you some suggestions. It is illegal for us to make any therapeutic suggestions or make any claims.

Mesh Screens.

If you use the Crocks early Method (i.e. 2 screens) be very careful not to let them touch or you will short out and flatten the batteries. A current limiting device has been fitted to output 2 as a safety measure. Ideas for your screen, you can use aluminium mesh, chicken wire or you can make flexible screen by sticking aluminium foil on to sticky backed plastic (Fablon). Or you can buy screens from us Code 5320.

Important Advice For Aura cleanser Users

I have recently spoken to someone who has just come back from working with Lee Crock. This information did not appear in the Nexus Article

The Aura Cleanser may push the toxins out of your cells, but you really need to aid your body to remove them or you **may not notice any improvement!**

To Aid detoxification of the cells Lee Crock recommends the following to all his patients using the Aura Cleanser.

1. **You must drink a minimum of 2 litres of water per day.**

2. You should take 5 g = **5000 mg of vitamin C per day**. This should be taken throughout the day in 1 g lots, **not taken all at once**. The easiest and cheapest way to do this is by using Vitamin C crystals they can easily be dissolved in any cold drink. 1/4 teaspoon of Vitamin C crystals is 1g = 1000 mg. Code. 3300 for 125g

3. You take the Herb **Carduus Marianus 20 drops four times per day**, in between meals. This herb is specifically recommended by Lee Crock as an effective liver cleanser .

(Herbs should usually be taken 2 hours after eating and then nothing to eat for 30 mins. In the UK they are sold as health foods and therefore the labels will always say take with food; this is the least effective way to use a herb). Code 7003 for 50 ml

Using the Aura Cleanser in the Bath!

OBVIOUSLY YOU MUST USE EXTREME CAUTION, MAINS ELECTRICITY AND THE BATH WOULD BE LETHAL. HOWEVER, TO BE SAFE, IF YOU LEAVE THE CONTROL UNIT OUTSIDE THE BATH ROOM AND CAN FEED A SCREEN LEAD UNDER THE DOOR. YOU MUST PLUG THE POWER SUPPLY PLUG INTO AN RCD DEVICE. (RCD is a mains cut out device).

To use the Aura Cleanser in the bath get a Stainless steel spoon, and hang the spoon so that the spoon end is in the bath and the handle sticks above the water. Connect the crocodile clip of your Aura Cleanser to the handle of the spoon. We have stuck this spoon to the bath using Duct tape. Do not put any bath products in the bath water, ie no soap or bath salts. It would be a good idea to allow at least 2, 15 mins cycles to go through, so a minimum of 30 min treatment is suggested.
