

## Total Cancer Remissions through Blood Electrification Combined with Magnetic Pulsing plus Silver Colloid

Theories Offered for Information and Educational Purposes Only and are the Author's Opinions 1996/1997

Robert C. Beck. D.Sc. Revision March 20, 1997

My archives contain a tantalizing **report** from several decades ago describing an authenticated record of an older man who was struck by lightning, survived, and subsequently grew a third set of teeth (yes!) and a bushy head of youthful new dark hair. His grossly metastasized, inoperable cancers vanished. He threw away his glasses and cane. and appeared much younger and was totally healthy for the first time ever. This fascinated scientists and years later almost encouraged some highly illegal and bizarre human experiments in an abandoned aircraft hangar in Wendover, Utah where Tesla coil research with ball lightning was underway. The incident generated wide speculation but **few** insights at the time. This mystery remained sleeping until 1990 when an astounding discovery was reported at Albert Einstein College of Medicine in NYC by Ors. Kaali and Wyman. Not surprisingly, the revolutionary data were apparently immediately suppressed. (See **Science News**, Mar. 30, '91 pg 207: and **Longevity**, Dec. '92 pg 14.)

As a totally unexpected and unpredictable outcome of the writer's self-funded research into "blood electrification" with micro currents for AIDS (currently showing excellent results), a growing number of users previously unknown to me began independently reporting remarkable "spontaneous remissions" of numerous *other* diseases *including cancer*. Most involved no doctors, medication. or time off. Recoveries occurred after subjects had self-administered an altered do-it-yourself in vivo blood electrification treatment partially described as an In Vitro process in US Patent ^5.188.738 issued to Dr. Steven Kaali in '93. (This work may have been anticipated **twenty years earlier** in 1973 by patent # 3.753.886 and by several others dating back to the turn of the century..) We were puzzled to find explanations. This preliminary report offers one possible theory. The magnetic pulser **success** with Cancer was independently **proven** in 1984 and described in US Patent ^4,665.898 and eleven other independent researchers and patents going back over fifty years.

The Einstein disclosure **describes removing** blood from one arm. electrifying it, and **returning** it to the other arm in **a process** similar to dialysis. It also describes surgically implanted active electrode chambers containing miniature batteries sewn inside blood **vessels**. This author's **preferred** approach leaves all blood in the **body**, is totally **non-invasive**, costs practically nothing and is safely accomplished in about a month or two with **-two hours per day exposures as one goes** about his normal activities. It handles pathogens while blood **flows** naturally through the --60cc **volume** of the electrified **forearm's** ulnar branch artery from wrist to elbow. Without medications, **invasive techniques** or doctors, most pathogens, **viruses**, microbes, parasites and fungi just tend to disappear. Progress **can be readily observed** with **dark-field** and phase-contrast **microscopy**. The entire process and simple apparatus with parts list is fully described in my '91 paper reprinted in **recent issues of Explore!** (Vol. 7 ^1. ^ & ^3). *Back issues: Box 1580, Mt Vernon, WA 98273. phone (360)424-6025.* Also simple instructions **far** self-made silver colloids of far better quality than you can usually buy are **given 1 n Explore More, Issue iM 5.** You **can** turn **any** glass of tap or distilled water into a 3 ppm top-quality electrolytic colloid in about **two minutes anywhere with a shirt pocket instrument** by simply running 27V (three 9V transistor radio batteries) between two short lengths of pure silver (never "Sterling") wires submerged in water. To date many "spontaneous remissions" of dozens of "incurable" **illnesses** including HIV **have** been reported by **users** and researchers of this "blood electrification" when combined with ingestion of pennies-per-gallon instantly self-made silver colloid plus magnetic pulsation. Since none of dozens of **friends using these** apparent **miracles has experienced** infections, colds, flu, pneumonia, or lost a single day's productivity in over three **years, evidence** strongly **suggests restored** immune systems or dramatically improved blood functioning. It is also fascinating to **note** that **several pet owners report their cats** now **refuse to** drink water if silver colloid is not added. Trips to veterinarians with previously recurring infections **were** cut dramatically. It is as though the Creator had left a secret "back door" method for **mankind to finally conquer** the adversary-incurable **diseases** plaguing us since the beginning of time. To avoid legalities, these data are **being offered** under first amendment **freedom** of speech rights and should not be construed as medical advice.

It has long been known that dissections of **cadavers** dying of natural **causes** reveal many have had cancer several times during their lifetime resulting in **"spontaneous remissions"** generally without their knowledge and without ever visiting a doctor. An optimally functioning **immune system somehow** automatically "handles" diseases of which the subject seldom becomes aware. Several promising broad-spectrum natural immunological agents like interferon and interleukin are produced by healthy immune systems but would cost thousands for patients with already overloaded or "shut **down**" **defenses** although many such neuropeptides could speed cures. Other respected researchers describe "pleomorphic" forms of **cancer** pathogens which evolve through several stages-even mycotoxin involvement- all of which may surrender to blood **electrification**. In spite of dozens of theories offered. most diseases disappear with these simple, rapid, inexpensive in-vivo do-it-yourself tools and *without* drugs, herbs, homeopathic. pharmaceuticals. diets, **doctors**, discomfort or any medical intervention. Users have nothing to buy except replacement batteries. Complete recoveries **cost** under **\$1.32** per patient per disease. **For persons** unable to self-assemble the simple electrifier (about two hours and -\$30), dozens of people are currently custom building them and several companies **are** providing excellent and reliable combination "plant growth stimulators" and colloid **generators** complete and ready to use. Most will retail ready-to-use from \$125 to \$200. But this health breakthrough is politically incorrect and may never be FDA approved because of billions invested in treatment facilities, pharmaceuticals. and in clinical diagnostic equipment which must be amortized even if obsolete. This discovery gives power over diseases *back to the individual* an economic disaster for the health cartels! The only dangers tie in too rapid detoxification avoidable by increasing water intake for flushing **wastes** (Herxheimer's syndrome), plus no ingestion of any herbs (even garlic) during blood electrification because of vastly enhanced cell absorption due to electroporation. (See J.C. Weaver;

Harvard-MIT in *Journal of Cellular Biochemistry*-^'.426\*435:1993.) All drugs, herbs, alcohol, tobacco, pharmaceuticals and some vitamins *must* be discontinued for at least two days before starting and for the duration of blood electrification or magnetic pulsing. This minimizes substances in your blood plasma which may become toxic if amplified to »20X their normal levels.

Electrification is now being successfully used underground around the world. One Eastern MD claims numerous documented **cancer cures** by using only blood electrification and no surgery, radiation, drugs or chemotherapy. Many were considered terminal. We're even seeing clean blood tests of now healthy patients with previously long-standing Lupus. We have in our possession many IRB's showing complete H1V remissions, sero-conversions, and negative PCR tests.

The most reasonable theory of why electrification is so surprisingly effective for so many conditions lies in the now-proven fact that when correctly applied directly over arteries (*not* into other body tissue like palms of hands, soles of feet, or organs) the process neutralizes all adversaries-microbes, pathogens, fungi, parasites, viruses, bacteria, myco-toxins and coexisting foreign life forms and alien invaders and their byproducts. This should never be confused with Royal Rife or Hulda Clark technology. Effective results are found to require a *minimum* of 27 Volts under load with low impedance output which must deliver up to several *milli* • amperes **measurable** current into skin to produce the required 50 to 100 *micro* -amperes internally through blood after the inevitable **series resistance** losses through vessel walls plus several layers of tissue. Electrical currents in blood can be measured with an ac microvolt **meter** by IRdrop, using partially insulated hypodermic needles inserted -6 Inches apart into the same artery. Clark's 'syncro zap" running at her standard 30 kHz (considered many octaves too high to be effective) actually measures only -2.6V **peak to peak under** load (-2000 ohms) at palms. This is found to be an order of magnitude too low to have any actual effect beyond placebo. **The** syncro-zapper's current is unmeasurable directly in blood and physically *cannot* produce the essential 50 to 100  $\mu$ A required internally. This may only mask readouts of parasite presence radionically. Unfortunately the live bugs remain undisturbed **and are** still there and will still be observed in stool and microscopic blood diagnosis. To function at all, electrification requires cotton-covered saltwater saturated stainless steel electrodes never over 3/32" wide and 1" long. These *must* be **carefully positioned** directly **over** and precisely in line with specific arterial pulse points, preferably between wrist and elbow. This maximizes current into blood by not diffusing it in surrounding tissue. Square or round TENS, EKG, EEG, EMG, etc. **electrodes** should **never** be substituted. Preferred instrument pulse-repetition rate is -4 Hz biphasic with steep rise time and 50% duty cycle. Rate is *not* critical although much higher frequencies and certainly higher harmonics of the essential square wave output are degraded by "skin effect" **where** currents travel around the outside of body instead of internally. This is demonstrated by lighting a bulb in one hand while touching a Tesla coil with the other **and** not getting shocked. Careful electrification **causes no** discomfort or any known harmful side effects to healthy cells or tissue. A restored and unencumbered immune system may make one almost immortal Electrified blood cells are observed to live for well over a month when sealed under cover slips on microscope slides while the **average** life of "normal" blood is under 4 days. This strongly suggests that even aging bodies may easily and rapidly be made Impervious to many hostile, toxic, infectious, antibiotic-resistant and even yet undiscovered invaders. This subject is barely scratched with miracles being reported regularly ranging from dramatic weight loss to restored hair, feature symmetry (Prof. R-Thornhill, Univ. N. Mexico), etc., many of which were totally unexpected but that I have personally experienced or observed.

One example- cervical cancer alone kills -1/3 of all victims in the third world, and has long been known to be caused by the papilloma virus. Electrification eliminates these toxic "fellow travelers" coexisting in our blood and automatically handles innumerable **diseases** previously considered "incurable". Ebola or other possibly genetically engineered biological warfare "designer" germs maybe unleashed someday per informed theories of Gulf War Syndrome diseases which are currently immune to all other known **vaccine** or antibiotic countermeasures except blood electrification and colloids.

Like all revolutionary **ideas**, this incredible breakthrough barely survived initial ridicule and rejection because it is too startling, effective, inexpensive, simple and foolproof to be generally believable. It has experienced violent opposition from entrepreneurs selling health products made obsolete. Next, massive resistance came from the population's -85% harboring unconscious hidden agendas or "death **wishes**" of "defeat the **healer**" and who must protect their secondary gains. And almost universally, people simply **refuse to** take responsibility for their own health. They think the "Doctor-Priesthood" should know what's "best" for them. **And** predictably, **some** doctors realize this will erode their **incomes** because it's cheap, universally **effective**, can be done "at home", and **cures** many things doctors can't. (A patient *cured* by a customer *lost* ^ So acceptance of blood electrification is just now emerging to enthusiastic acceptance from those who've actually experienced results. Being profit-motivated, the establishment must resist anything like this. But we now have our "hundredth monkey". Skeptics have only to use this technology to directly enjoy immensely better health. **Take back your power! This works**

The writer is a researcher, not a practitioner. **I have** nothing **for sale**. Please never try to contact me by phone or letter or through third parties or publications **since** it is a felony for me to discuss well intended medical questions. I am a physicist, not a licensed medical practitioner and these devices may never be FDA approved. But I *am* preparing a do-it-yourself photo illustrated manual **covering** all details which should be available by the end of this year
