Variable Voltage Clarks Zapper (with sweeping frequency)

We have been asked by several of our practitioners if we would produce an even higher voltage Clarks Zapper. So after some research and development we have now produced the Variable Voltage Clarks Zapper. It has a sweeping frequency output that continually sweeps between 10Khz and 100Khz and an output voltage of between 8 volts and 20 volts (approx.), the output voltage is shown on the Digital display.

Why the higher voltage?

Put simply the higher the voltage, the further the Zapping effect will penetrate the tissues. The advantage of this is that the deeper problems will be more effectively treated. This means it may even affect and treat the bowels.

The voltage displayed is the actual voltage being delivered to the user. So when you pick up the electrodes you will notice a small voltage drop. This is the result of your body using the power of the Zapper, so you can see that you are getting Zapped.

We have not included automated timing because the people most likely to use this type of high power Zapper will want to time it themselves, also it helps to keep the cost down.

This high power Zapper is made to order by hand.
Product code 5207 £165

9 volts to 20 volts

Do you want us to make Colloidal Silver?

For the last 10 years according to our ethos we have steadfastly refused to make Colloidal Silver, encouraging you to buy a Colloidal Silver Maker so you can produce it cheaply yourself.

However, recently more and more of you have been ringing up asking us to supply Colloidal Silver Solution itself. As you know we provide the high strength starter solution 15 ppm (approx.) for getting the Golden Colloidal Silver going.

We could supply a bottle of 10 ppm 100 mls for £9.75 this does not include postage. Which in the UK would be £3, (all orders over £30 postage is free in the UK).

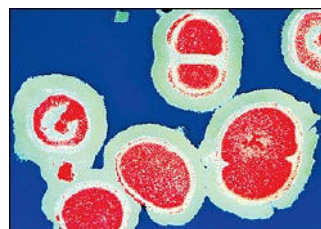

If you would be interested in this product, please give us a quick ring or send an email, and if there is sufficient interest we will produce this low cost 10ppm solution for you.

Colloidal Silver and Acne.

We have had more and more customers reporting success using colloidal gel for treating acne. Customers reported that it was often best to apply it after washing the skin with fairly warm water. Also it was reported that quicker results were obtained if it were applied more frequently, preferably 4 times per day. Remember, don't squeeze spots you will make them much worse and last much longer. The colloidal silver gel will help reduce contamination of the skin and promote the healing of existing eruptions!

MRSA

Methyl-Penicillin resistant Staphylococcus Aureus

This seems to be getting more and more press as we approach the election.

Hospitals are not clean enough! We are told time and time again!!

Unfortunately this is not the simple answer it would appear to be. The problem is really with the staff them selves. It is thought in some places that as many as 1 in 3 of us carry the MRSA bug in our noses quite harmlessly. It is easy to imagine how they might infect people who are weak and vulnerable.

When I see pictures on television of operations I am alarmed to see how much human bacterial contamination is possible.

I did my microbiology degree in the 70's and we knew about MRSA then, we also knew how to kill it effectively using a type of virus called a bacteriophage which only affects bacteria. Yet 30 years later thousands of people in the UK die every year from this infection.

In 2003 the Press Association released an article. This was its headline

Scientists Hope to Attack MRSA with Virus

By John von Radowitz, Science Correspondent, PA News Dec 2003

British researchers hope to turn the tables on the MRSA superbug by infecting it with viruses, it was revealed today.

Yet 2 years later we have heard nothing. The Russians have been using this technology successfully for decades. I remember in 2002 an entrepreneur was featured on Horizon who was going to import this bactereiophage. Yet nothing happened.

Are you beginning to smell a rat!!!

I have a theory. The Bacteriophage that would solve the MRSA problem almost overnight is **not** patentable. As such it is never going to make any money. Furthermore the Bacteriophage will replicate all by itself; it is a self proliferating **cure** to the problem. i.e. no more continuing, profit making sales. So if you were a pharmaceutical company, would you want this Bacteriophage released for sale? It would be financial suicide. Much better to keep on selling loads and loads of expensive antibiotics that need to be taken for 4 to 12 weeks at a time.

So what should you do?

Fortunately, Colloidal Silver will kill MRSA. If you are facing an operation, it would be wise to build your blood levels up of Colloidal Silver before your operation. It is far more difficult to fight an established infection, than preventing it from getting a hold in the first place. Spend a few weeks taking Colloidal Silver and boosting your immune system before you face exposure to MRSA. For methods of taking Colloidal Silver see our web site, Select Colloidal Silver and from that sub menu select FAQs, then select Methods of taking Colloidal Silver.

Electro Magnetic Fields & Health

EMF Electro Magnetic Fields have become more significant in health issues lately. Some forms of EMF can be stimulating to health if used correctly, like the DC field pulse from our Magnetic Pulsar. This produces a one off blast of DC magnetic energy just like a magnet. However, prolonged exposure to alternating fields of EMF can cause ill effects. Reported effects vary from as little as mild headaches to depression and cancer. It has long been thought that living under power lines increases your risk of cancer.

Recently, one of our customers reported that he used to sleep with his mobile phone next to him on his bedside table. He started to have very vivid dreams and nightmares, when he left his phone downstairs he did not get them. He tested his theory and confirmed it.

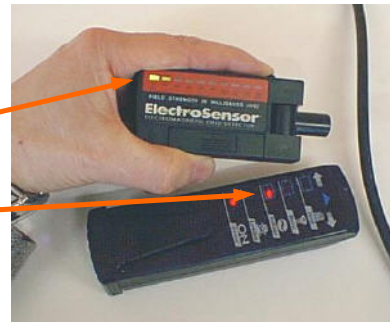

We have pointed out that you should not have any EMF fields within two feet of your **Aura Screen** as it will affect the detoxification process. Many of you have asked how do we know if there are any wires in walls or floors that could have an affect.

After doing some research we have come up with a simple to use EMF detector. It is quite different from a simple mains cable detector, because it actually measures field strength. For example in the picture below, the main detector is detecting the mains cable, yet the EMF meter barely detects anything at all. However,

In this picture you can see

The EMF detector is detecting a safe low level.

The mains detector is detecting a live wire.

If we switch on the appliance that this mains cable supplies the EMF goes up dramatically.

We would highly recommend that if you are using an Aura Cleanser you test the area in which you are using it, for unknown EMFs.

It is quite surprising to find out what simple things in your home are emitting potentially damaging EMF waves. For example in the picture below you can see that the standard type cordless phone that is in countless homes puts a surprisingly large EMF, yet the standard mains detector next to it detects nothing at all

In this picture you can see

The EMF detector is detecting a very high level of EMF

The Mains detector is not detecting anything!

Another shock was our office lighting, it had a huge EMF which radiated to a level just penetrating our heads at the maximum level on our detector. We have decided to change our lighting system to something which emits a far lower EMF.

The detector is a relatively cheap investment at £39.95
Code. 7005

Some interesting reports from our customers

Deep seated infection

This particular man had a deep seated infection in one of his knees. He had treatment on it for 2 months with no effect. His surgeon said that he would have to operate again if the infection did not clear up!!

This customer used his magnetic pulsar to treat his knee and got almost instant results. His knee was better the next day. Peter H

Kidney pain

This man had very bad back pain. His Doctor believed it was from a kidney problem, probably kidney stones. He started to use his Aura Cleanser and the next day he passed crystals in his Urine and the Kidney pain cleared up.

Congested Lungs

This customer had a chronic case of congested lungs. He began using his Aura Cleanser and his lungs cleared for the first time in years!

Skin, bladder, back pain improve.

This is from a letter sent in by one of our (older) customers.

"I usually sleep with the Aura Cleanser switched on underneath the mattress. Since using it a sore which would not heal under the right arm pit cleared quickly (about 1 week). This embarrassing itching has greatly reduced and there is less back pain from a slipped disc. My bladder is functioning much better with fewer trips to the bathroom. The toe nail infection is improving with less discolouring of the toe nails. Pain from my left heel is reduced".

This customer is using his screen beneath his mattress, which will mean its effectiveness could be even greater if the screen was put on the top side of the mattress. However, it just shows how effective the Aura Cleanser can be!

Broken Arm heals at last.

J is a fit young 18 year old male rugby player. He was a good player and in one particular game he had his left arm badly broken just above the elbow. He had several operations and the bone was pinned back together. However after 12 weeks it still had not healed. He used the magnetic pulsar on his arm every 3 hours. At first he noticed increased discomfort in his arm, after 3 days the pain had stopped. When he went back for x rays one week later his surgeon was amazed and said no more treatment was needed.

We would like more reports from our customers, if you report a benefit and we print it we will give you a free 30 ml jar of D101. Many thanks Chris.

Syncrometer Basics Video.

We now have this video back in stock. It gives you clear instructions on how to make and use the Clarks Syncrometer. The Syncrometer allows you to diagnose what may be troubling you.

The Cost of the video is £20, (In the UK, P&P is free on all orders over £30, other wise add £3 to your order. For other countries please call for cost of P&P).

Volunteers needed to test new skin tightening Eye Gel

We are going to test the effectiveness of a new skin tightening gel that we have developed. The Gel contains only plant components, the active ingredient is an extract of Siberian Ginseng and the gelling agent comes from a plant source. So it couldn't be more safe and natural.

Have you ever noticed the adverts on television for those anti wrinkle creams, their results are often based on only 25 people. Yet they have a national TV campaign, claiming how effective it is.

We would like to run the trial on at least 25 people so we can make an equivalent evaluation.

If you would be interested in taking part in this trial, please call us on 01293 446244 saying you are interested in the Eye Gel trial and we will send you details.
