

DEAR CUSTOMERS

In This Issue:

Welcome to our November newsletter. We will be continuing our special offers to help offset the economic crisis affecting us all. There is also helpful advice regarding Colloidal Silver and the effects of EMF (Electro Magnetic Fields)

Bad Walnut Harvest

As many of you know we make one of the best Black Walnut tinctures in the world. We make it to Clark's original recipe; it is green in colour (as the photograph right shows) and contains vitamin C. This year has not been good for walnuts. Adverse weather conditions has resulted in most walnut crops rotting. Because of this production next year will be limited. We will be giving preferential supply to our existing customers when stocks become really low.

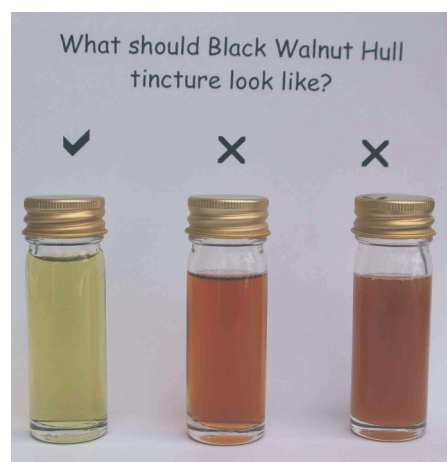

Reduced prices - NO VAT.

We are reducing the price of our Black Walnut Hull tincture, Clove and Wormwood capsules back to £8.03 per item. Buy all three items and you will receive a free copy of the parasite program and 10% off for a total price of £21.68. Buy now at www.goodvitality.com (Product code 7007)

Colloidal Silver hints and tips.

As you all know Colloidal Silver (CS) kills many germs, in fact we are pretty certain it kills all single cell organism. Many of our customers think of CS as the invincible killer of all things bad. CS is a fantastic magic bullet, however, as with all magic bullets you need to get it to its target. There are many things that can prevent it getting there. Here is an example:-

A customer dipped his toothbrush regularly into his bottle of CS to kill the germs on it. What he forgot was that the component in his toothpaste could reduce the effectiveness of the CS. Our advice to him was to use the sprayer to spray the toothbrush.

If the site of your infection or healing problem is on the outside of your body we would suggest you try CS Gel ([Product code 5130 30ml or 5140 60ml](#)) or CS spray ([Product code 5127](#)). However, if you want to treat an internal ailment, you need to consider other methods of administration. You can find all this information at this link:- <http://comsci.org.uk/content/5000d.htm>

EMF damage and dirty electricity.

In the latest copy of Nexus magazine there is an article on the effects of electricity and the increased levels of cancer for people who are constantly exposed to high levels of EMF.

In the reputed scientific journal The Biologist Vol 54 No3., the production of the hormone melatonin is significantly reduced in those people exposed to high EMF. Melatonin is an essential hormone involved in important regulation of the circadian rhythms affecting several biological functions. Melatonin stimulates the production of growth hormone essential for repair throughout the body. There are many essential systems within the body that will be affected from fertility to cancer risk.

What most people do not realise is that everyday household items emit high levels of EMF. The only way to know where these dangerous EMF are, is to test for them. Our simple EMF detector could not be easier to use, just press and hold the button and a coloured scale reveals your potential risks from EMF.

When you locate EMF areas in your house make sure you spend as little time as possible in those fields. Make certain that your bed and especially your head are not being exposed.

Purchase an EMF detector ([Product code 7005](#)) at www.goodvitality.com
