

Aura Cleanser B battery powered

Many of you have asked us for a battery powered Aura Cleanser. We have done quite a bit of research and have found out that the latest machines available from Lee Crock use batteries with an output of 4.5 volts. This is good news because this has enabled us to develop a battery powered version using our own programmed computer chip. Aura Cleanser B is only battery powered and is completely portable.

The unit contains 2 green lamps which indicate which output is positive (they swap every 15 mins). The Red lamp comes on and stays on when the batteries need to be replaced (battery life 3 months of continuous use approximately). The battery compartment contains 3 groups of 3 batteries.

- Timer Electronically controlled
- 4.5v DC output
- Polarity lamps
- Dual out put for either Crock or Mexistem Cleansing.
- Silent operation.
- Battery failure protection system BFPS. When the batteries get too low the RED lamp comes on.

Some words from our Customers about the Aura Cleaner

Mr A. "My Frozen shoulder was 80% better after just one night of treatment I am amazed".

Mr I. "This machine is fantastic, this is as good as a 28 day water fast detoxification"

Mrs T " I am sleeping like a baby again, after years of insomnia".

Mr A "My Arthritis gets better every day".

Mrs E "Now I am sleeping so well and have so much energy".

Ms D "My Eczema has got so much better, nothing else worked, I am so pleased".

Our Concern

Very few of you have purchased the herb Carduus marianus, for use when Aura Cleansing.

This is a very important part of the process along with Vitamin C and water. Lee Crock makes all his clients do this.

WEB SITE.

Our web site has been quite successful and so has Paypal especially for our customers abroad. However, it has shown that the internet is not as black and white as we might think. I was always under the impression that e mails could not get lost. However, this is not the case in the last 3 months alone 3 customers orders through Paypal did not get forwarded to us from Paypal. We asked Paypal about this and they said with the volume of traffic now on the internet it is impossible to ensure 100% transmission of e mails and that we should check our account regularly. This is from an international bank!!! So, send us an e mail as well and it is wise to ask for a read receipt, this can be selected from the tools menu in outlook express.

The Becks Zapper

Or as it should really be called the
Becks Bioelectrifier or Blood Purifier

Many people confuse the Becks Zapper with a Clarks Zapper, in fact they are very different and work in completely different ways.

The Clarks Zappers work on the principle of resonance; a good analogy is that of the opera singer breaking a wine glass. The Becks Zapper is more like electrocuting a bug to death; in fact it has been shown that white blood cells use a very similar principle, they produce an electric shock using chemicals on the surface of the offending organism.

The Becks device is aimed at treating only the blood. Your blood should contain no bacteria yeast mould, viruses or parasites. This is rarely the case; most people do have some organisms present in the blood. The Becks device puts a low level electric current in to the blood at the ankle pulse point and damages the out side of the organism that pass by it. This can limit or even kill the organism and certainly makes it more vulnerable to your immune system.

Why the ankle Pulse points.

Simply, this is because this is where the biggest arteries that are near to the skin surface. In just 20 mins all of your blood will pass this point. I personally do not think the wrist arteries are big enough.

What about electroporation?

Electroporation is where the surface of your blood cells may become more porous and allow more nutrient to enter the cells. This may result in some substances affecting you more. Originally Bob Beck recommended that all nutrients and supplements, even homeopathics should be stopped because of electroporation. However, he did feel strongly that a lot of people were exploited by costly supplements. We have been using the Becks Zapper in our clinics since 1994 and never seen one case of electroporation.

Colloidal Silver.

The Becks device also makes high quality Colloidal Silver. Colloidal Silver kills ALL bacteria even MRSA, all viruses, moulds, yeast including CANDIDA. It will even kill some parasites and single animals like the protozoa Giardia the commonest STD.

Coming soon, a book on the
Becks Protocol

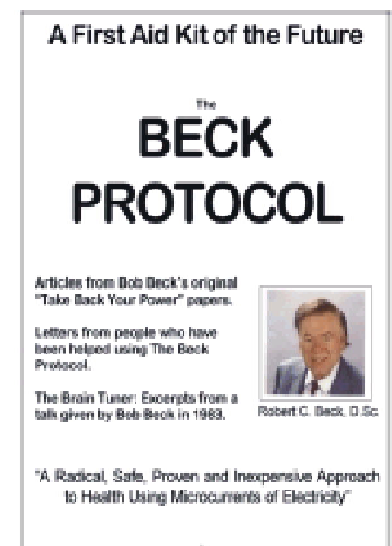

So what are the pros and cons of the Becks Zapper.

Pro's

1. Dual purpose device, Zaps and produces Colloidal Silver.
2. Kills all bacteria, yeast mould and viruses.
3. Produces Colloidal Silver which will kill all single cell organisms.

Con's

1. Only treats the blood.
2. You need to be in one place while using it.

“Chris what kind of Zapper have you got“?

The most commonest question I get asked is “what kind of Zapper have you got?” then the next question is “why”?

Well this is my story and I hope it answers all those questions.

In November 1994 I was running a shop and Clinic in Hove employing 14 different therapists and 7 other employees. As you could imagine I was a busy chap and the buck stopped with me. A reporter friend of mine came in to the shop and asked me if I could help him get a “Becks Zapper” working. He knew my hobby of 30 years was electronics. He carefully explained what the Zapper was supposed to do and how it worked. I thought he was completely mad, but I saw that it was an easy device for me to sort out and I soon had it working for him. I also secretly hoped that he would not mention this mad cap idea to me again. My life got even more busier as Christmas approached.

In January 1995 I got the Flu, and I mean the flu. I was in bed, prostate for 12 days, before my bones stopped aching enough for me to get up and move around. The only problem was that I had a severe case of post viral fatigue, I was completely exhausted all the time and it felt like I was stuck to the bed in the morning, it was so difficult to get up! Unfortunately being the self employed boss of a busy clinic I had to drag myself to work each day. During the next 4 months I had every therapist in the clinic working on me to help me recover. Everything from aromatherapy to advanced nutrition. Nothing helped! I was just as bad. One Thursday my reported friend came in to the clinic and in my desperate state I asked if I could try his mad device called the Becks Zapper. He brought it back to the clinic that afternoon.

I took it home and that evening I found my ankle pulse points, covered them in a small strip of wet gauze, then placed a fine strip of silver on the gauze which was then taped in place with micropore tape. I then switched on the device adjusted it to a comfortable level and sat back and watched Tomorrows World, thinking how mad is this!!! After 1 hour I switched off the Zapper and drank plenty of water that evening.

I went to bed early as usual for me these days and fell off to sleep quickly. The next morning I woke with the alarm as usual but this time it felt like someone had switched me back on. All my energy was back I felt refreshed, I didn't have to peel myself off the bed sheets. It felt wonderful after nearly six months of being ill to feel normal again and this was after just one hour session.

As you can imagine this astounding event set me of on a course of research and exploration and provides a very simple answer to those first two questions.

I very quickly made my own Becks Zapper and before long my hobby had grown by popular request to the place it is today!

Of course things have moved on since 1995. The Becks Zapper now has even more power and can make Colloidal Silver. As a microbiologist I can't imagine why Colloidal Silver is not being extensively used by the NHS to wipe out MRSA. But as a realist in health care I know this comes down to one simple thing - MONEY. There is no profit in Colloidal Silver.

As promised in our last newsletter methods of taking Colloidal Silver are now on our web site. To access the information on the Left hand menu bar, select Colloidal Silver, from the new menu select FAQs, then on the right side of the screen select “Methods of taking Colloidal Silver”. Concerning frequently asked questions I am asked so often which is the Best way to take Colloidal silver. I have to say rectally. You will get your blood levels of Colloidal Silver up with this method better than any other. A lot of people are put off by this method, but it really is very easy and a Rectal Delivery kit is only £2.75. I would say it is probably 100's of times more efficient than any other way.

Rectal Delivery kit Code 6020 £2.75

Vitamin B17 and Cancer

Some of its other names are Laetrile, Amygdalin or Nitrilosides.

You are probably wondering what it is and why are we telling you about it in our newsletter.

B17 is a naturally occurring substance that we used to eat a lot more in our diet 300 years ago. Gradually over the last 100 years we have eaten less and less of the food that contain B17. At the same time our incidence of cancer has gone up. This could be pure coincidence. However, there is a group of people called the Hunzas, who live in the Himalayas who usually live to over 100 (some surviving to 120), who rarely get cancer. Guess what! They eat a diet rich in B17. They also have a diet that is very low in toxins, eat little meat and drink plenty of good water.

There has been quite a lot of scientific investigation in to the Hunzas and their longevity.

From our point of view we are mainly interested in preventing disease and would like to offer this simplified explanation of how B17 works to prevent and fight cancer.

Put very simply cancer is a group of cells who keep on reproducing. Originally they were cells that were repairing an area of damage in the body. The trouble with them is they have not switched themselves off!!

These cells are covered with a special protein coating which the immune system fails to recognise. If you dissolve this protein coating, the body's natural defence mechanism recognises these cells and destroys them. The enzymes which do this are Trypsin and Chymotrypsin and are produced by the pancreas.

Researches have found that B17 has a very beneficial role in this process. The cancer cell wall has an enzyme in it called beta-galactosidase. When B17 comes in to contact with this enzyme it converts it in to three compounds, glucose, benzaldehyde and hydrogen cyanide. This trio attacks the cancer cell while ignoring normal cell tissue. In other words B17 is tumour specific and the naturally occurring hydrogen cyanide targets the cancer cell and no others. This is a very simple explanation and it is not assumed that B17 alone will cure cancer. Rather it is a very important part of the overall process and very helpful in preventing cancer.

So where can you get B17?

Well you are not allowed in this country to buy B17 supplements. However you can buy foods rich in B17.

Guess what, the richest source of B17 is the very same source of B17 that the Hunzas have been eating for 100s of years, namely Apricot Kernels. These in fact come from the Himalayas and are produced without harmful chemicals or pesticides. The kernels or seeds must be chewed thoroughly in the mouth to get the B17 out of the kernel. If they are swallowed whole they will be of no benefit. They have a bitter taste which most people get used to quickly.

How many should you eat. Well, adults could eat about 7g per day this is about 20 kernel per day. (This picture has 5 kernels in it).

I eat 10 with breakfast and 10 with my evening meal, along with a healthy low animal fat diet.

A 900g bag of Apricot kernels as pictured above, which contains approximately 2400 kernels, is enough for 4 months, and costs only £37.00 including 1st class letter postage. This information is not on web site yet but will be added shortly.

Practitioners

We could be referring you patients!!

Over the last few years we have been asked by more and more customers for practitioners using Zappers (Becks and Clarks), Magnetic Pulsars, Colloidal Silver or Ozonated Water. We would like to compile a list of people using these devices for referral purposes. Obviously referral would be on an information basis only. We could not make any comment on the practitioners competency but could at least refer someone who could provide some information or experience. This would be useful for customers who are a long way from our clinic.

If you are a practitioner and would like to be added to our list please fill in the following form and return it to us.

Information in brief.

Black Walnut Hull Tincture.

This year the harvest of Black Walnuts has been good, so we are no longer worried by our dwindling stocks.

We should like to point out that as far as we know we are the only people in the UK to produce Black Walnut exactly to Hulda Clarks specification. This is made from whole walnuts (not powdered dry shells). We also put the Vitamin C in as she requests and our tincture is clear and greenish in colour! This photo shows the colour it should be. It reminds me of the colour of the Liqueur Chatreuse. If your tincture is a murky brown colour then it may not do the job of killing those nasty parasites adequately!

Interesting Reports from 2 customers.

Severe arthritis in shoulders and other large joints responded very quickly to Black Walnut hull!

Recycling Policy.

Where ever possible we are going to recycle packing materials. So if your goods arrived in used boxes don't be surprised.

Web site ordering

When placing your orders on our web site using Paypal, please remember to put your postal address in your Paypal account, otherwise we won't know where to send your goods. Also remember if your order is for less than £30 you must add £3 P&P, which is found in its own category.

Magnetic Pulsar

For economic reasons we are no longer making our own Magnetic Pulsar. So we are now importing and supplying the MPG from Sota.

This device is their very latest model and has a whole host of features. Please check out our website for more information.

The Magnetic Pulsar can be found in the Becks Zapping Menu.

For those of you who don't know what it does!

The Magnetic Pulsar is used to damage micro-organisms that hide deeper in the tissues that cannot be affected by the Beck's Zapper. Typically these sites are the lymph nodes but can be other areas where blood supplies are not good. This poor circulation can even be caused by some micro-organisms themselves.

How does it work? This device emits a strong magnetic pulse into the tissues to a depth of about 6 inches. This induces micro currents within the tissues and damages the external surfaces of micro organisms. This helps to disable them, so your immune system can overcome them in the same way as it does with the Beck's Zapper.

Product code 5010 £178

D101 Results still improving with long term use

Some of our long term (one year or more) users of D101 are reporting quite amazing results saying that their friends tell them they look 10 years younger. This is fantastic news, we predicted this would probably be the case with Collagen Repair. However, it's all very well saying that. Has anyone got any photographic proof they can send us for use in our newsletter.

The person who can provide us with the best photographs will win 6 x 60 ml jars of D101 worth £90.
